FOOD FORMER DHF 2000

Machine Type

The DHF 2000 is a drum-type former designed to form up to 800 patties per hour. Form round, oval, square, choppette or natural shape portions. Our patty former provides precise portion control of patties and meatballs. A drum-type former gently forms the portions with minimum pressure. Homemade style patties are deposited onto the discharge conveyor with or without paper for further processing or packaging.

The mix is placed in the hopper and the rotating propellers gently feed the product into the cavity of the drum forming the shape and weight you require. The thickness of the patties, thus the weight, can be continuously adjusted from 5-25 mm. Special sizes are available

As the drum rotates, the piston is pushed out of the drum and a stainless steel wire strips the portion from the piston and the product is deposited onto the conveyor belt. The machine has a continuously adjustable speed. Can be operated via foot pedal.

Specifications

	DHF 2000
Speed (U/min)	2000
Max Paper Dimension (mm)	135 x 135
Max Diameter Single Shape (mm)	125
Max Diameter Double Shape (mm)	2 x 50
Power (kW)	0,75
Voltage (V)	230
Dimensions (mm)	
Height	650
Width	600
Depth	700
Weight (kg)	65
