CUTTER DMK 120 V2AW

Professional Design

The DMK 120 V2 AW cutter is the ideal cutter for larger meat processing plants due to its robust design. The well thought-out design offers the user almost unrestricted use in all areas of application. The machine is equipped with two independently operable, powerful motors that offer a high degree of control versatility.

The cutter impresses with its extremely quiet, low-vibration operation, even in the high speed range.

The elaborate manufacturing of the individual components is carefully and precisely coordinated. The thick-walled cutter bowl, cast from high-quality stainless steel, has an extremely precise concentricity, which allows the cutter knives to be set tightly in the bowl radius. The bearing technology of the cutter bowl allows durable use even at high speed.
