

Packaging machine for fish DHA 400

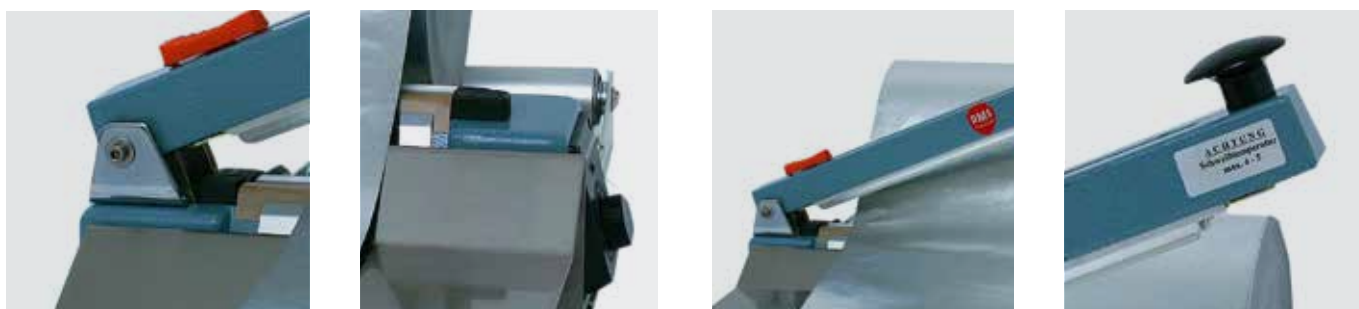

Keeping it fresh

The packaging machine for fish DHA 400 is used exclusively for packaging fish with tubular film. On account of its well thought out method of construction it is ideal for packaging without any leakage or odour in medium sized butcher's shops and for supermarkets.

The space saving design makes it either ideal for the sales counter or it can be equipped with a mobile table.

Packaging machine for fish DHA 400

Machine type

- Stainless-steel packaging table
- Double roll table
- Easy to use
- continuously adjustable heat dial, with control light
- pressing arm equipped with a blade for cutting the tubular foil
- high stability due to anti-slipping rubber feet
