

Knife-Sharpener Sharp X Compact

Design

The electric knife-sharpener that maintains the sharpness of your knives and restores the sharp edge. The appliance is equipped with a unique sharpening-wheel that sharpens the knife by 20 ceramic pins that are positioned crosswise in a wheel that rotates with a speed of 330 rpm.

The ceramic pins guarantee a careful and efficient sharpening that forms the knife-edge in a correct angle.

The sharpening-wheel with the 20 ceramic pins is a Swedish patented invention.

For very dull knives, a more aggressive sharpening method might be required and we then recommend that the knives are given to a professional for sharpening instead.

Specifications

	Knife-Sharpener Sharp X Compact
RPM	330
Fuse (A)	0,8
Voltage (V)	230
Dimensions (mm)	
Height	70
Width	150
Depth	200
